

SmartNPS360

App Testing Checklist

Use this list while testing the SmartNPS360 app on your phone. Tick **Done** when finished. In the yellow **Notes** column write **Pass** or **Fail**. If something fails, write what you saw.

1. Open the app & internet

Done	What to test	Expected result	Notes
■	Open SmartNPS360 from your phone	App opens and shows the SmartNPS360 website (login or home).	
■	Turn on Airplane Mode, then open or reload the app	You see "No internet connection" and a Retry button.	
■	Turn internet back on and tap Retry	The page loads again.	

2. Login & logout

Done	What to test	Expected result	Notes
■	On the login page, enter a wrong password and submit	Login fails. You stay on the login page.	
■	Log in with a correct account	You enter the officer area of the app.	
■	Fully close the app, then open it again (while still logged in)	You can continue without problems (session still works).	
■	While your shift has ended (off duty): log out	You return to the login page.	
■	While still on shift (on duty): try to log out	Logout is blocked. Message says you must end your shift first.	

3. Bottom menu (after login)

The bottom menu shows only on the main Dashboard, TimeSheet, and Profile pages.

Done	What to test	Expected result	Notes
■	Tap Dashboard	Dashboard page opens. Menu item looks selected.	
■	Tap TimeSheet	Monthly timesheet page opens.	
■	Tap Profile	Profile page opens.	

4. Clock in / shift attendance

Phone Location must be on. The app may show "Location required for shift attendance" with buttons **Cancel** and **Continue**. You may need location set to **Always / Allow all the time**.

Done	What to test	Expected result	Notes
■	Start clock-in / shift attendance from the app	If a location message appears, title is about location for shift attendance.	
■	On that message, tap Continue (then allow location when the phone asks)	You can move to the next location step.	
■	If asked, set location to Always / Allow all the time	Clock-in can complete.	
■	Clock in outdoors or near a window (good GPS)	Attendance / clock-in succeeds.	

Done	What to test	Expected result	Notes
■	On the location message, tap Cancel	Clock-in stops. You are not forced to continue.	
■	Turn Location off on the phone, then try clock-in	You may see "Turn on location services" or Open Settings / Cancel.	
■	If Open Settings is shown: open Settings, fix location, return to the app, try again	Clock-in works after location is fixed.	
■	If the phone uses fake/mock GPS, try clock-in	You see "Mock location detected" and an OK button. Clock-in does not succeed until mock GPS is off.	

5. During your shift (on duty)

Done	What to test	Expected result	Notes
■	Start / stay on duty with location fully allowed	Shift stays active. On Android you may see a notification: "Sharing live location".	
■	Leave the app for a few minutes while still on duty (open another app)	App does not crash. You can return and continue.	
■	If a top banner asks for location (button like Enable Location / Allow Location)	Tapping the button helps you fix location settings.	
■	End your shift (go off duty)	Location sharing stops. You can log out after this.	

6. Camera & photos

These appear when a page asks for a photo (for example reports, visits, or profile / ID).

Done	What to test	Expected result	Notes
■	When asked for a photo, allow Camera and take a picture	Camera opens. Photo can be attached.	
■	Cancel without taking a photo	You return safely. App still works.	
■	Choose a photo from your gallery when asked	You can pick an image and attach it.	
■	Deny Camera permission, then try to take a photo again	Photo does not work. App shows that permission was denied.	

7. Notifications

Done	What to test	Expected result	Notes
■	Allow notifications when the phone or app asks	Notifications are allowed.	
■	Ask your team to send a test alert while the app is open	You see the notification (sound if the phone is not silent).	
■	Receive an alert with the app closed, then tap the notification	App opens to a SmartNPS360 page (often Dashboard).	
■	Turn off notifications for SmartNPS360 in phone Settings	Alerts stop until you turn them on again.	

8. Other actions

Done	What to test	Expected result	Notes
■	On Profile, update your details and save (if the page allows)	Changes are saved.	
■	If a page offers Share, tap it	Phone share options open.	
■	If a page offers Download, download a file	Download completes. App does not crash.	
■	If the website has light / dark mode, switch it	App look updates to match.	

9. Full use cases

Done	What to test	Expected result	Notes
■	Open app → log in → tap Dashboard, TimeSheet, and Profile	All three pages open. No freeze.	
■	Log in → clock in (Continue + allow Always location) → stay on duty a few minutes → leave app briefly → end shift → log out	Full day path works. Logout works only after the shift ends.	
■	Try clock-in with Location off → turn Location on → clock in again	Blocked first (settings message), then works.	
■	Wrong password, then correct password	Fails first, then successful login.	
■	On a page that needs a photo: take photo → attach → save / submit	Photo is attached and saved.	
■	Get a notification → tap it	App opens to the related SmartNPS360 page.
